Ali Sarkeshik

Summary

Solutions-driven Full Stack Developer/Software Engineer who uses ingenuity and creativity to build fluid and functional web applications. My previous experience includes method development in Chemistry and Instrumentation (hardware and software troubleshooting) in a resale and OEM environment.

Experience

UC San Diego Extension
Full Stack Developer
February 2019 - Present

GitHub: <https://github.com/AliSarkeshik>

Projects: <https://alisarkeshik.github.io/UpdatedPortfolio/portfolio.html>

- **NBA Clicky Game (React.js):** The user has 20 player cards to choose from. Clicking on a card adds 1 point to their total score. If the same card is clicked twice the game ends.
- **JavaScript Trivia Game:** The user has 3 minutes to answer all the questions. At the end their score is computed and printed to the screen.
- **GifTastic (using AJAX):** Clicking a button will display a GIF onto the screen. The user can then play and pause the GIFs when clicking on the GIF. Customize your GIFs by typing your request into the text field and clicking "Submit."
- **Amazon Manager:** MySQL, Node.js, Inquirer, and Express are utilized in this app which allows a Manager to view their inventory, see which items are running low, and add items.
- **Train Scheduler:** Using Firebase, this "Train Scheduler" allows the user to input train information which is subsequently uploaded to a table at the top of the screen.

Group Projects

- **Travel Guide:** This group project combines Javascript, AJAX, and APIs. The user enters their destination city and from there the app outputs Hotel information, points of interest, fun events, and weather.
- **Pub Crawl:** Our group project will help you match with a brewery that you probably have never heard of, but you will definitely love.

Technologies Used: Bootstrap, Express, JS/JQuery, Heroku, Node, and Handlebars.

Certificate program learning front-end and back-end technologies through a dynamic curriculum: Database Theory, HTML5, CSS3, JavaScript, Java, MongoDB, MySQL, jQuery, Bootstrap, Express.js, React.js, Node.js, Bookshelf.js, AJAX, Firebase, Command Line, Heroku, and Git.

PerkinElmer, Inc.
Customer Support Engineer
June 2018 - December 2018
San Diego, CA

- Provided on-site personalized support services for PerkinElmer instruments
- Provided troubleshooting expertise and repair skills needed to help identify and resolve issues related to hardware, software or applications support.
- Performed PMs, installs, and repairs on various Perkin Elmer instruments (Janus, LabChip, SciClone, Zephyr, and Euroimmune products).

Roche Diagnostics

Planned Activities Specialist/Field Service Engineer

January 2018 - May 2018

Greater San Diego Area (Contract position via Tailored Management)

- Performed on-site preventative maintenance, installation, and technical updates (TSB's) on company products (Cobas 6000 and 8000 analyzers).
- Diagnosed mechanical, hardware, software and system failures.
- Trained in: CD Foundations of Hardware, IT Products, c6000/8000 Service Operator Training, and Cobas 6000 Install/Core Service.

BioSurplus, Inc.

Service Engineer

January 2017 - July 2017

San Diego, CA

- Determined the re-sale viability of company acquisitions.
- Diagnosed, repaired, and serviced a wide range of laboratory equipment.
